

## Easy Set Up Using the Google Home App

- 1 Screw or plug in your smart bulbs and power them on.
- 2 Open the Google Home app and add your smart bulbs to the app.

Voila! You have enabled all of your smart light features including voice and out of home control!

Note: This set up process is only for Cync Smart Bulbs. All other Cync products must be set up through the Cync app along with your lights to get app, voice, and out of home control.

## Enable Out of Home and Amazon Alexa Voice Control

By pairing with a Cync or C by GE  
Smart Plug + Amazon Alexa device  
(sold separately)

- 1 Install your Cync or C by GE smart plug (the plug is required to enable out of home and voice control).  
*Tip: Having trouble connecting? Move your smart plug closer to your router to commission.*
- 2 Screw in and power on your Smart Bulbs.
- 3 Download the Cync App.
- 4 Add your smart plug and smart bulbs to the same room/group within the Cync App.
- 5 Enable voice control by following the directions within your voice assistant's app.
